PREPPING ART FOR PREPRESS 101

Because we believe **PRESENTATION IS EVERYTHING®**, we know there's nothing more important than getting your artwork exactly right. We take pride in our work, and want to see you fall in love with your custom presentation materials and beautiful luxury packaging.

To ensure your artwork is accurately represented, pick the option that best describes you, and follow the steps!

I HAVE ADOBE CREATIVE SUITE ART FILES.

Excellent! Please review the **Spec Sheet** provided by your sales rep to ensure your artwork is set up correctly within your Adobe files.

You're almost done! Before you submit, double-check that you have **our templates** placed on your artwork. Be sure to **package all native files, fonts, and links.** Now you're good to submit!
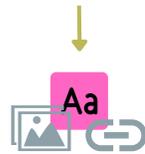

I HAVE ART FILES BUT NOT IN ADOBE CREATIVE SUITE.

You're halfway there; in line with industry standards we **do not** accept art files in programs other than Adobe Creative Suite.

However, our prepress technician can recreate your artwork in the correct software if you provide **PDFs**. Make sure the PDF of your artwork has the correct sizing with our die placed on top so we have an example for reference. Charges may apply.
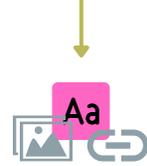

You'll need to provide **all high-res photos, fonts, and links** from your design for our team to place.
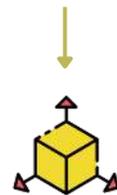

I HAVE MY ART AND ASSETS, BUT NO FINISHED DESIGN FILES.

There's a bit more work to be done! But our prepress team can help. Charges may apply.

If you don't have design programs available to you, we can fill our template based on your design. You'll need to provide **all high-res photos, fonts, and links** from your design for our team to place.

To ensure accurate placement, provide **a detailed sketch** of where you'd like all type, logos, art, and photos to be placed. Include dimensions showing how far from the edge you would like all items.

SUBMIT

It's time to send your artwork off to prepress!
